CW Magnetrons for industrial applications

HFD is a stocking distributor of CW Magnetrons. CW Magnetrons are a low-cost, efficient cross-field microwave oscillator used for the generation of continuous-wave (CW) signals. S-band (2450MHz), L-band (915/896MHz), and the new 5.89 GHz CW magnetrons are typically used in industrial drying and heating applications requiring CW microwave energy.

Power Range:

300w - 30kw : 2450 MHz.

700w : 5.86 GHz.

Distributors:

 Nisshinbo Micro Devices Inc.

Pulse Magnetrons for marine navigation

3 years / 3000 hours warranty

- Magnetrons
- Limiters
- Low Noise Front Ends (LNFE)
- Circulators
- Filters
- Dummy Loads
